Senior Web Designer/Digital Art Director

September 2013 - Present

FoodServiceWarehouse.com Englewood, CO

I am primarily responsible for UI design, HTML and CSS on the newly-rebuilt FSW.com, and the maintenance of the legacy site. I built the new version of FSW.com in Bootstrap and SASS to be fully responsive, created all mockups in Sketch, and aided developers with DOM manipulation in AngularJS. I provide technical leadership for other UI designers being the final word on HTML/CSS code reviews, acting as art director, and deciding what technologies and frameworks to use on new projects. I also lead a recent FSW rebranding effort designing the final logo and creating the current color scheme.

Web Designer

March 2012 - July 2013

Applus RTD Boulder, CO

I designed and developed all web interfaces for Applus RTD's internal training, invoicing, and record retention using Bootstrap, Golden Grid, and jQuery.

Co-Founder & Principal / Art Director

February 2010 - February 2012

Lavafish Studios Streamwood, IL

I was the creative partner in a small startup that designed and developed iOS apps. Two of these apps were games featured in the App Store's "New and Noteworthy" section, one in "What's Hot" and the other in "What We're Playing."

Associate Web Editor

February 2007 - February 2010

Scranton Gillette Communications Arlington Heights, IL

I developed several micro-sites for company related trade shows and conventions designed in Photoshop and built in HTML, CSS and Javascript.

Web Designer

December 2005 - January 2007

ICS Solutions, Inc. Huntley, IL

I designed and built over 50 original small business websites using Photoshop, HTML, CSS and plugging in house-built VB modules. I created brand identities for small businesses by designing custom websites, logos, business cards and media kits. I also mentored new hires in web design.
